

## ZENA AND ZELDA

**WHAT AM I?**

A Giant African Millipede

**WHERE WOULD YOU FIND ME LIVING IN THE WILD?**

On the Rainforest floors in Africa

**HOW DO YOU LOOK AFTER ME AS A PET?**

I live in a tank with lots of deep soil and bits of bark which is kept warm and wet. Then every day we get sprayed with water and we pretend that it is raining

**WHAT DO I LIKE TO EAT?**

In the wild we like to eat the rotting wood and any bits of leaves of fruit which have fallen from the trees. As a pet we get fed bits of cucumber, tomato and apple, or any soft bits of fruit and vegetables.

**WHAT DO I LOOK LIKE?**

We have a long shiny body which feels hard just like your finger nail does and we have lots and lots of legs. Some people think we have a million legs but we don't – we have around 250 little legs

**WHY DO WE LOVE THEM?**

We love watching all their little legs working together to see them walking along the floor like the Mexican Wave

## MY STORY

Hello, our names are Zena and Zelda and we live at Lion Leainers in Barnsley. Zena is the one which is slightly smaller and more confident Zelda is a little bigger. We love to tickle everyone we meet by walking along hands with all our feet some people say it feels like Velcro but that is just us using our legs to help us grip on, so we don't fall off. We like to sleep together under our coconut hide during the day as we are nocturnal
