

Hazel, Maple & Willow

What are we?

Fancy Mice

Where do we live in the wild?

All over the world! Mice are very adaptable and can live in many different places. They will eat anything they can get their paws on!

How are we looked after as pets?

We live as a group in a large cage with lots of tubes and boxes to hide in and chew, plus toys to play with. We love our wheel and our seesaw! We really enjoy making nests out of everything!

What do we eat?

A mix of rodent muesli, cereals, seeds, dried pasta and little bit of dog kibble. We love fruit and veg too.

What do we look like?

We are little creatures with shiny fur, big ears and a very long tail to help us balance when we climb. Hazel is chocolate brown, Maple is brown and white and Willow is grey and white. Fancy mice can be lots of colours, patterns and coat types.

Why do we love them?

The girls and very brave for such little creatures. They are very friendly and happy to be handled.

Our Stories

We are sisters who came to Lion Learners East Midlands when we were 6 weeks old from a lovely breeder who spent lots of time with us when we were babies. We live together and go everywhere together. We will hopefully be joined by some mousey friends in the future as female mice are very sociable.

Where can we visit?

Almost anywhere including outdoor events. Schools, parties, children's centres, holiday clubs, after school clubs, libraries etc. We can even be handled by gentle pre-school children with adult supervision. We are gentle and good at sitting still.

Our small size means we aren't well suited to care homes or being handled by unsupervised pre-school children or those still learning to be gentle. (Check out our rabbits and guinea pigs who will be more than happy to visit you).
