

# Loki, Thor & Nanook

**What are we?**

Fancy Rats

**Where do we live in the wild?**

All over the world! Rats are very adaptable and can live in many different places. They will eat anything they can get their paws on!

**How are we looked after as pets?**

We live as a group in a large cage with fleecy hammocks to sleep in and toys to play with. We love wooden chew toys. We have play time out of our cage every day.

**What do we eat?**

A mix of rodent muesli, cereals, dried pasta and little bit of dog kibble. We love fruit and veg too.

**What do we look like?**

We are dumbo rex rats so we have big ears of the side of our heads and soft wavy fur. Thor is grey, Loki is white and Nanook is cream with red eyes. Pet rats come in lots of colours and patterns. We have a long scaly tail for bal-

**Why do we love them?**

They are very naughty and nosey boys who are interested in everything! They love to sit on your knee so you can stroke them.

## Our Stories

We are brothers who came to Lion Learners East Midlands when we were 6 weeks old. We are best friends who go everywhere together. Loki is the bravest brother and the most likely ratty to come out for some fuss!

## Where can we visit?

Schools, parties, children's centres, holiday clubs, after school clubs etc.

We best suited to being handled by older children. We are a bit fidgety for nursery visits and care homes and we don't cope very well with outdoor events.
