

Juniper

What am I?

Rabbit *Oryctolagus cuniculus*

Where do I live in the wild?

Wild rabbits live all over the world in grassy habitats. They dig burrows under the ground for protection from predators and the weather.

How am I looked after as a pet?

We live in a shed with a large run attached. Lots of hay, hides, tunnels and toys. My husband Joey and I, live together—rabbits are much happier with company and it makes us feel safe.

What do I eat?

I am a herbivore. Lots and lots of grass and hay. A small amount of rabbit nuggets and a little bit of fresh veg. Carrots aren't great for me!

What do I look like?

Cute! Long, floppy ears as I'm a lop rabbit. Grey fur which is super soft. Us rabbits have wonderful, strong back legs for hopping and jumping.

Why do we love Juniper?

Juniper is super soft and we love to watch her racing around outside, she can be super speedy! She is the sensible one of the pair and makes sure Big Joey doesn't get up to too much mischief.
